

A grayscale photograph of the Washington Monument and the Lincoln Memorial steps. The Washington Monument is visible in the distance, centered in the background. In the foreground, the wide, stone steps of the Lincoln Memorial lead down towards the right. The sky is clear and light-colored. The overall scene is a wide-angle shot of a significant landmark in Washington, D.C.

Los Angeles 2021 Summary Slides

**Prepared by
The National Emerging Threats Initiative
J. David Hamby, National Coordinator**

Introductory Notes

This report was created from drug seizure data submitted by High Intensity Drug Trafficking Areas (HIDTAs) operating throughout the United States. These data are housed in the Performance Management Process reporting system maintained by the Washington-Baltimore HIDTA for the expressed goals of disrupting illicit drug markets and improving the efficiency of HIDTA initiatives.

HIDTA Research Guidance & Procedures for Use of Performance Management Process (PMP) Data. (2021, April 23). High Intensity Drug Trafficking Areas. <https://www.hidta.org/hidta-research-guidance-procedures-for-use-of-performance-management-process-pmp-data/>

Description of Graphs

2021 Seizures in Kilograms for Selected Drug Categories: *This slide summarizes seizures as a percent of all selected index drugs.*

2021 Seizures in Doses for Selected Drug Categories: *This slide summarizes seizures as a percent of estimated doses for all selected index drugs.*

2021 HIDTA and U.S. Seizures in Doses for Selected Drug Categories: *This slide compares estimated seizure doses as a percent of total index drug seizures for the specific HIDTA and all HDTAs.*

Cocaine Seizures in Doses 2011 – 2021: *This slide shows estimated doses seized by year for the target HIDTA.*

Methamphetamine Seizures in Doses 2011 – 2021: *This slide shows estimated doses seized by year for the target HIDTA.*

Heroin Seizures in Doses 2011 – 2021: *This slide shows estimated doses seized by year for the target HIDTA.*

Fentanyl Seizures in Doses 2011 – 2021: *This slide shows estimated doses seized by year for the target HIDTA.*

Los Angeles HIDTA Key Findings

Except for lower Cocaine seizures, Los Angeles HIDTA patterns were similar to national norms.

Cocaine seizures were erratic throughout the reporting period, with a significant spike in 2018.

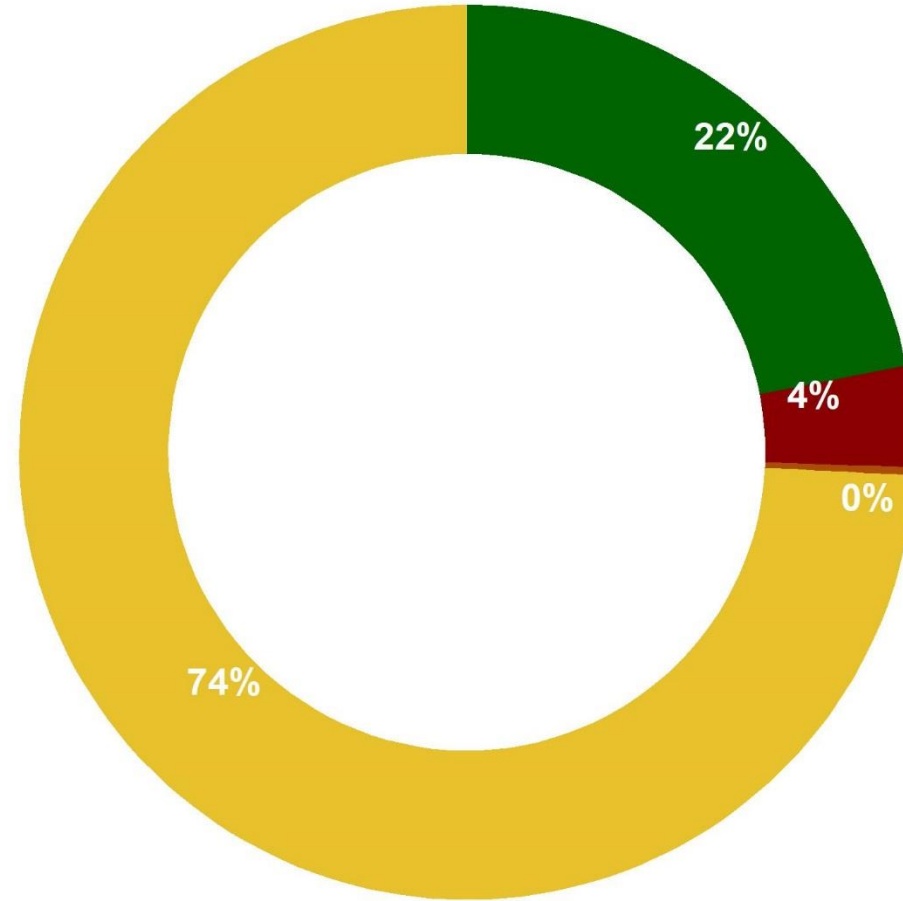

Methamphetamine seizures trended upward throughout the period, with a significant spike in 2021.

Heroin seizures increased from 2011 through 2015 and declined through the remainder of the period.

Fentanyl seizures emerged in 2014 and increased through the remainder of the period, with a significant spike in 2021.

2021 LOS ANGELES HIDTA SEIZURES IN KILOGRAMS FOR SELECTED DRUG CATEGORIES

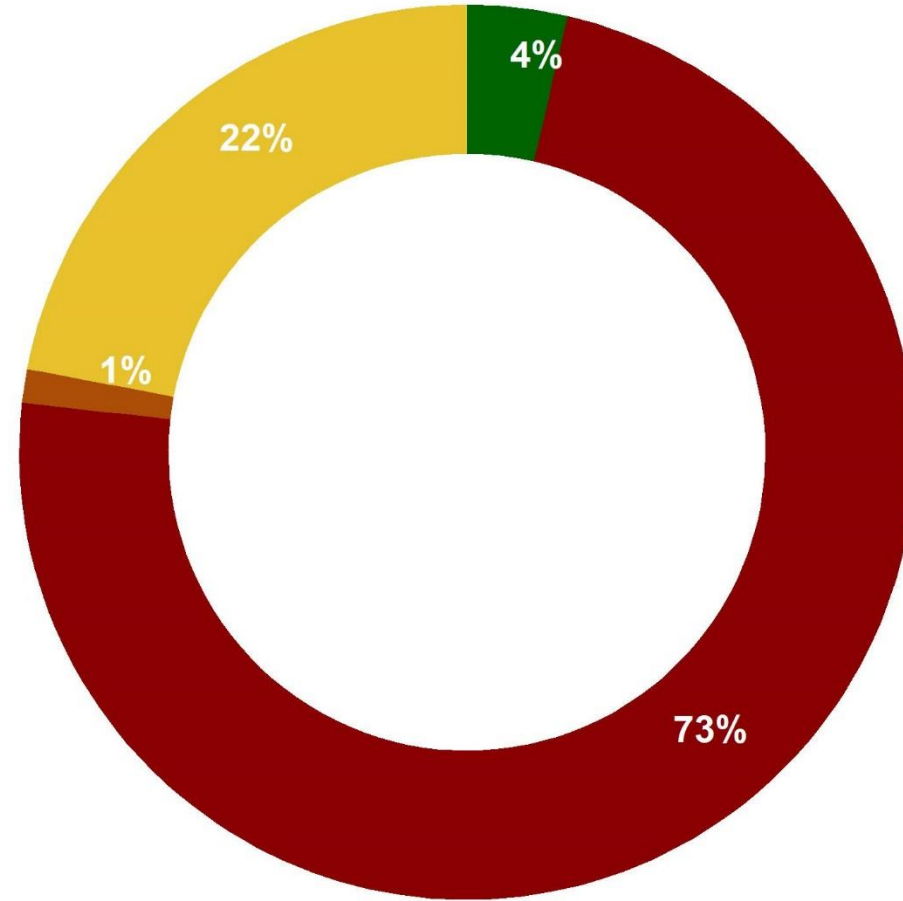

DrugThreat Heroin Methamphetamine Cocaine Fentanyl

Seizures based on the
HIDTA Performance
Management Process.

2021 LOS ANGELES HIDTA SEIZURES IN DOSES FOR SELECTED DRUG CATEGORIES
